Salente InductPro2

Induction cooker you can always have by your side

It takes up almost no space, but it can cook almost anything. What are we talking about? About Salente InductPro2 double-plate induction cooker which boasts a compact and ultra-thin design (only 4.5 cm high), so it can easily fit even into the smallest kitchen, cottage or caravan. You can simply cook your favourite homemade dishes anywhere you have a socket available.

When energy is gently transformed into perfect taste

Thanks to the 90% efficiency of the electromagnetic induction, this little helper cooks much faster than conventional electric hotplates. It saves up to 50% energy and 60% time. Instead of waiting a long time for the hotplate to heat up, it provides you an immediate power – no delays, no electricity waste. And what is the best? The induction technology ensures that only the pot is heated, not the plate. So, you can forget about burnt-on food residues.

One rotary knob to control everything

Do you want to turn your induction cooker on or off? Do you need to set the correct temperature or adjust the cooking power? Or do you want to use the timer to switch off the appliance automatically after the set time (up to 180 min) has elapsed? It cannot be easier! You can set all of the above tasks so easily, only with the multi-function rotary knob which allows a quick and intuitive control without unnecessary button pressing. You can easily select the function that the multi-function rotary knob is about to control using the button-less touch control which is not only user-friendly, but also durable. The two large and high-contrast LCD displays provide you control over the current operation.

Specifications:

- Double-plate design
- Unique multi-function rotary control for quick temperature, power and time settings as well as switching the cooker on and off
- Ultra-thin compact design (only 4.5 cm high)
- High 90% efficiency of electromagnetic induction saves electricity and time (saving up to 50% energy and 60% time compared to standard cookers)
- Instant power without waiting and long heating up
- Glass ceramic surface with continuous and smooth surface for easy and quick cleaning
- Elimination of burnt on the hotplate thanks to indirect heating
- 10 temperature settings (60-80-100-120-140-160-180-200-220-240 °C)
- 10 power settings of left hotplate (200-350-500-650-800-1000-1200-1400-1600-1800 W)
- 10 power settings of right hotplate (200-350-500-650-800-900-1000-1100-1200-1300 W)
- Long-lasting buttonless touch control
- Suitable for cookware with a diameter of 12–26 cm
- Microprocessor-controlled operation and cooking
- Automatic detection of induction cookware
- Automatic detection of cookware diameter
- Automatic shutdown after removing the cookware from the surface
- Boost function for turning on max. power for 30 seconds
- Function for heating milk to 60 °C and maintaining temperature for 20 min.
- Five-fold safety protection
- Automatic switch-off after 2 hours of inactivity
- Child lock function for locking the control panel
- Two large and high-contrast LCD displays (80 × 24 mm)
- Timer with automatic switch-off after the selected time has elapsed
- Timer setting range: 0–180 min. in 1-minute increments
- Self-diagnostics monitoring for any display problems
- Rubber anti-slip feet
- European certifications LVD, EMC, RoHS
- Rated power: 3100 W (1800 W + 1300 W)
- Rated current: 14 A
- Rated voltage: 220-240 V
- Rated frequency: 50/60 Hz
- Power cord length: 1.5 m
- Dimensions (w × d × h): 57.4 × 36.3 × 4.5 cm
- Weight: 4.4 kg

Package content:

- Induction cooker
- User manual (EN/DE/CZ/SK/HU/RO/IT/SLO)
